

TRADE COLLABORATION™
ENGINE

Assessments

Identify your gaps. Define your risks. Chart your roadmap.

To know where you're going, you must know where you're at. TC Engine's assessments leverage our Trade Compliance Standard™ (TCS) to identify systemic gaps in an export compliance program. We define and measure your export control capabilities across business functions, processes, networks, and systems. We identify your gaps and provide you with a plan to close them.

Benefits of Assessments:

- ✓ Gaps Identified
- ✓ Risks Prioritized
- ✓ Business and Compliance Cases Documented
- ✓ Path Forward Defined
- ✓ Strategy Communicated to Key Stakeholders
